

# Breaking news from Varifit Orthotics the hottest new foot orthotic fabrication system on the market today!

## Varifit Releases Cutting-Edge Cast Correction Software

Varifit Orthotics is proud to announce the release of the most powerful cast correction software on the market. When used in conjunction with the Varifit [Accu-Scanners](#), the cast correction screen of the [3D Analytics](#) software suite allows you to modify the digital casts with industry-standard cast corrections, including:

- Intrinsic fore-foot varus or valgus balance
- Arch fill
- Lateral expansion
- Heel width adjustment
- Medial ("Kirby") heel skive
- Positive cast section (Modified Blake inverted protocol)
- Metatarsal dome
- Relief cut-outs

Store the negative casts and corrected positive casts on your PC for future reference, and to eliminate the need to recast. Biomechanical examination, patient education, and orthotic prescription writing has never been this comprehensive, integrated, and easy!

**Call today to schedule a live, one-on-one webinar and see a demonstration of this powerful software package - (877)796-7496**
