

# www.orthoVP.com is new and improved

Have you noticed the latest improvements to our web site? A new field has been added -- YOUR ORDERS. If you have ever wished you could make ordering easier by repeating a previous order? Have you wished you could easily find a list of what you ordered last time or at some point in the past? Wish no more! Your wishes have been granted! A new feature has been added to our web site that will remember orders previously placed on line through our site.

Once you log on using your secure ID and password, you will be taken directly to the on-line catalogue main page. The new field, YOUR ORDERS, is on the right side of the page below YOUR CART. A new feature, BOOKMARKED ORDERS, recalls orders you have chosen to bookmark during the check-out process of a previous order, allowing you to repeat all or part of that order for future use. The second field, "PREVIOUS ORDERS", allows you to scan orders recently placed on the site. In addition, a short list of recently **viewed** items appears under the heading, RECENT ITEMS so that you can easily select an item for a new order without having to browse the catalogue again.

We would appreciate any feedback from you relating to how these features may have enhanced your on-line shopping experience.
